

to all allegations of discrimination on the basis of handicap in programs or activities conducted by the agency.

(b) The agency shall process complaints alleging violations of section 504 with respect to employment according to the procedures established by the Equal Employment Opportunity Commission in 29 CFR part 1613 pursuant to section 501 of the Rehabilitation Act of 1973 (29 U.S.C. 791).

(c) Responsibility for implementation and operation of this section shall be vested in the Equal Employment Opportunity Director.

(d) Complaints may be delivered or mailed to the Equal Employment Opportunity Director, ATBCB, 330 C Street, SW., Rm. 1010, Washington, DC 20202.

(e) The agency shall accept and investigate all complete complaints over which it has jurisdiction. All complete complaints must be filed within 180 days of the alleged act of discrimination. The agency may extend this time period for good cause.

(f) If the Equal Employment Opportunity Director receives a complaint that is not complete, he or she shall notify the complainant, within 30 days of receipt of the incomplete complaint, that additional information is needed. If the complainant fails to complete the complaint within 30 days of receipt of this notice, the Equal Employment Opportunity Director shall dismiss the complaint without prejudice, and shall notify the complainant of such dismissal.

(g) If the agency receives a complaint over which it does not have jurisdiction, it shall promptly notify the complainant and shall make reasonable efforts to refer the complaint to the appropriate government entity.

(h) The agency shall notify the Director of the Compliance and Enforcement Division of any complaint alleging that a building or facility is not readily accessible to and usable by handicapped persons. The Director of the Compliance and Enforcement Division shall determine whether or not the building or facility is subject to the Architectural Barriers Act of 1968, as amended (42 U.S.C. 4151-4157), or section 502 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 792).

(i) Within 180 days of the receipt of a complete complaint over which it has jurisdiction, the agency shall notify the complainant of the results of the investigation in a letter containing—

(1) Findings of fact and conclusions of law;

(2) A description of a remedy for each violation found; and

(3) A notice of the right to appeal.

(j) Appeals of the findings of fact and conclusions of law or remedies must be filed by the complainant within 90 days of receipt from the agency of the letter required by §1154.170(g). The agency may extend this time for good cause.

(k) Timely appeals shall be accepted and processed by the head of the agency.

(l) The head of the agency shall notify the complainant of the results of the appeal within 60 days of the receipt of the request. If the head of the agency determines that additional information is needed from the complainant, he/she shall have 60 days from the date of receipt of the additional information to make his/her determination on the appeal.

(m) The time limits cited in paragraphs (i) and (l) of this section may be extended with the permission of the Assistant Attorney General.

(n) The agency may delegate its authority for conducting complaint investigations to other Federal agencies, except that the authority for making the final determination may not be delegated to another agency.

PART 1190—MINIMUM GUIDELINES AND REQUIREMENTS FOR ACCESSIBLE DESIGN

Subpart A—General

Sec.

1190.1 Purpose.

1190.2 Applicability: Buildings and facilities subject to guidelines and standards.

1190.3 Definitions.

1190.4 Issuance of Architectural Barriers Act standards by standard-setting agencies.

1190.5 Guidelines: Other uses.

1190.6 Interpretation of guidelines.

AUTHORITY: Sec. 502(b), Rehabilitation Act of 1973 (29 U.S.C. 792(b)(7)), as amended by the Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978 (sec. 119, Pub. L. 602, 92 Stat. 2982, and the Rehabilitation Act Amendments of 1986 (Pub. L. 99-506, 100 Stat. 1801).

SOURCE: 47 FR 33864, Aug. 4, 1982, unless otherwise noted.

Subpart A—General

§ 1190.1 Purpose.

The purpose of this part is to implement section 502(b)(7) of the Rehabilitation Act of 1973 (29 U.S.C. 792(b)(7)), as amended, which requires the Architectural and Transportation Barriers Compliance Board to establish minimum guidelines and requirements for standards issued under the Architectural Barriers Act of 1968 (42 U.S.C. 4151 *et seq.*), as amended. This part and the standards to be based on it are intended to ensure that certain buildings and facilities financed with Federal funds are designed, constructed, or altered so as to be readily accessible to, and usable by, physically handicapped persons.

§ 1190.2 Applicability: Building and facilities subject to guidelines and standards

(a) *Definitions.* As used in this section, the term:

(1) *Constructed or altered on behalf of the United States* means constructed or altered for purchase by the United States, or constructed or altered for the use of the United States.

(2) *Primarily for use by able-bodied military personnel* means expected to be occupied, used, or visited principally by

military service personnel. Examples of buildings so intended are barracks, officers' quarters, and closed messes.

(3) *Privately owned residential structures* means a single or multifamily dwelling not owned by a unit or subunit of Federal, state, or local government.

(b) *Buildings and facilities covered.* Except as provided in paragraph (c) of this section, the standards to be issued by the standard-setting agencies in conformance with these minimum guidelines and requirements apply as provided in paragraph (d) of this section to any building or facility—

(1) The intended use for which either—

(i) Will require that such building or facility be accessible to the public, or

(ii) May result in employment or residence therein of physically handicapped persons; and

(2) Which is—

(i) To be constructed or altered by or on behalf of the United States;

(ii) To be leased in whole or in part by the United States after August 12, 1968, and before January 1, 1977, after construction or alteration in accordance with plans and specifications of the United States;

(iii) To be leased in whole or in part by the United States on or after January 1, 1977;

(iv) To be financed in whole or in part by a grant or loan made by the United States after August 12, 1968, if the building or facility may be subject to standards for design, construction, or alteration issued under the law authorizing the grant or loan; or

(v) To be constructed under the authority of the National Capital Transportation Act of 1960, the National Capital Transportation Act of 1965, or Title III of the Washington Metropolitan Area Transit Regulation Compact.

(c) *Buildings and facilities not covered.* The guidelines and requirements and the standards do not apply to—

(1) Any privately owned residential structure, unless it is leased by the Federal government on or after January 1, 1977, for subsidized housing programs; or

(2) Any building or facility on a military installation designed and constructed primarily for use by able-bodied military personnel.

(d) *Application and effective date of standards.* Any covered building or facility, as provided in this section, which is designed, constructed, or altered after the effective date of a standard issued in conformance with this guideline which is applicable to the building or facility, shall be designed, constructed, or altered in accordance with the standard. Any other building or facility covered by the Architectural Barriers Act, if and when required by law, shall comply with such standards issued in conformance with this part as are appropriate.

[47 FR 33864, Aug. 4, 1982, as amended at 54 FR 5444, Feb. 3, 1989]

§ 1190.3 Definitions.

As used in this part, the term:

ATBCB means the Architectural and Transportation Barriers Compliance Board.

Access aisle means a pedestrian space between elements such as parking spaces, seating, and desks.

Accessible means in compliance with the specifications and requirements of any applicable standard issued by a standard-setting agency in conformance with this part. *Accessible* describes a site, building, facility, or portion thereof that complies with these requirements, and that can be approached, entered, and used by physically handicapped persons. Accessible elements and spaces of a building or facility including doors provided adjacent to a turnstile or a revolving door, shall be subject to the same use patterns as other elements and spaces of the building or facility.

Accessible route means a continuous unobstructed path connecting accessible elements and spaces in a building or facility and complying with the space and reach requirements of any standard issued by a standard-setting agency in conformance with this part. (Interior accessible routes may include but are not limited to corridors, floors, ramps, elevators, lifts, and clear floor space at fixtures. Exterior accessible routes may include but are not limited

to parking access aisles, curb ramps, walks, ramps, and lifts.)

Accessible space means a space that complies with any standard issued by a standard-setting agency in conformance with this part.

Adaptability means the capability of certain building spaces and elements, such as kitchen counters, sinks and grab bars, to be altered or added to so as to accommodate the needs of persons with or without disabilities, or to accommodate the needs of persons with different types or degrees of disability.

Addition means an expansion, extension, or increase in the gross floor area of a building or facility.

Agency means a Federal department, agency or instrumentality, as defined in sections 551(1) and 701(b)(1) of title 5, United States Code, or an official authorized to represent an agency.

Alteration means any change in a building or facility or its permanent fixtures or equipment. It includes, but is not limited to, remodeling, renovation, rehabilitation, reconstruction, changes or rearrangement in structural parts, and extraordinary repairs. It does not include normal maintenance, reroofing, interior decoration, or changes to mechanical systems.

Architectural Barriers Act means the Architectural Barriers Act of 1968, Pub. L. 90-480, as amended, 42 U.S.C. 4151 *et seq.*

Assembly area means a room or space accommodating fifty or more individuals for religious, recreational, educational, political, social, or amusement purposes, or for the consumption of food and drink, and including all connected rooms or spaces with a common means of egress and ingress. Such areas as conference and meeting rooms accommodating fewer than fifty individuals are not considered assembly areas.

Automatic door means a door—

(1) Used for human passage and

(2) Equipped with a power-operated mechanism and controls that open and close the door upon receipt of a momentary actuating signal.

Building or facility means all or any portion of buildings, structures, equipment, roads, walks, parking lots, parks, sites, or other real property or interest in such property.

Circulation path means an exterior or interior way of passage from one place to another for pedestrians, including, but not limited to, walks, hallways, courtyards, stairways, and stair landings.

Clear means unobstructed.

Common use areas means those interior and exterior rooms, spaces or elements that are made available for the use of a restricted group of people (for example, residents of an apartment building, the occupants of an office building, or the guests of such residents or occupants).

Construction means any erection of a new building or of an addition to an existing building or facility.

Cross slope means the slope that is perpendicular to the direction of travel (see *running slope*).

Curb ramp means a short ramp cutting through a curb or built up to it.

Detectable means perceptible by one or more of the senses.

Detectable warning means a standardized surface texture applied to or built into walking surfaces or other elements to warn visually impaired people of hazards in the path of travel.

Dwelling unit means a single unit of residence that provides a kitchen or food preparation area, in addition to rooms and spaces for living, bathing, sleeping, and the like.

A single family home is a dwelling unit, and dwelling units are to be found in such housing types as townhouses and apartment buildings.

Egress or means of egress means a continuous and unobstructed way of exit travel from any point in a building or facility to an exterior walk or out of a fire zone. It includes all intervening rooms, spaces, or elements.

Element means an architectural or mechanical component of a building, facility, space, or site, *e.g.*, telephone, curb ramp, door, drinking fountain, seating, water closet.

Entrance means any access point to a building or portion of a building or facility used for the purpose of entering. An entrance includes the approach walk, the vertical access leading to the entrance platform, the entrance platform itself, vestibules if provided, the entry door(s) or gate(s), and the hardware of the entry door(s) or gate(s).

The principal entrance of a building or facility is the main door through which most people enter.

Essential features means those elements and spaces that make a building or facility usable by, or serve the needs of, its occupants or users. Essential features include but are not limited to entrances, toilet rooms, and accessible routes. Essential features do not include those spaces that house the major activities for which the building or facility is intended, such as classrooms and offices.

Exception means a special provision in this part or in a standard which indicates an acceptable alternative, under specified circumstances, to a requirement stated directly above the exception.

Extraordinary repair means the replacement or renewal of any element of an existing building or facility for purposes other than normal maintenance.

Full and fair cash value is calculated for the estimated date on which work will commence on a project and means—

(1) The assessed valuation of a building or facility as recorded in the assessor's office of the municipality and as equalized at one hundred percent (100%) valuation—

(NOTE: The one hundred percent (100%) equalized assessed value shall be based upon the state's most recent determination of the particular city's or town's assessment ratio.

Example: Town X has an assessment ratio of forty percent (40%), and the particular building in question is assessed at \$200,000.00. To determine the equalized assessed value of this building, divide \$200,000.00 by .40, and the equalized assessed value equals \$500,000.00.);

(2) The replacement cost; or

(3) The fair market value.

Guidelines and requirements means this part.

Housing means a building, facility, or portion thereof, excluding inpatient health care facilities, that contains one or more dwelling units or sleeping accommodations. Housing may include, but is not limited to, one-family and two-family dwellings, multifamily dwellings, group homes, hotels, motels, dormitories, and mobile homes.

Marked crossing means a crosswalk or other identified path intended for pedestrian use in crossing a vehicular way.

Multifamily housing means a project containing five or more dwelling units.

Operable part means a part of equipment or an appliance used to insert or withdraw objects, to activate or deactivate equipment, or to adjust the equipment (e.g., coin slot, push button, handle).

Physically handicapped person means an individual who has a physical impairment, including impaired sensory, manual, or speaking abilities, which results in a functional limitation in access to and use of a building or facility.

Power-assisted door means a door—

- (1) Used for human passage; and
- (2) With a mechanism that helps to open the door, or relieve the opening resistance of a door, upon the activation of a switch or a continued force applied to the door itself.

Public use means any interior and exterior rooms or spaces made available to the general public. Public use may be provided at a building or facility that is privately or publicly owned.

Ramp means a walking surface that has a running slope greater than 1:20.

Reconstruction means the act or process of reproducing by new construction the exact form and detail of a vanished building, structure, or object, or a part thereof, as it appeared at a specific period of time.

Restoration means the act or process of accurately recovering the form and details of a property and its setting as it appeared at a particular period of time by means of the removal of later works or by replacement of missing earlier work.

Running slope means the slope that is parallel to the direction of travel (see *cross slope*).

Section 502 of the Rehabilitation Act or section 502 means section 502 of the Rehabilitation Act of 1973, Pub. L. 93-112, 29 U.S.C. 792, as amended.

Service entrance means an entrance intended primarily for delivery or service.

Shall denotes a mandatory requirement.

Signage means the display of written, symbolic, tactile, or pictorial information.

Site means a parcel of land bounded by a property line or a designated portion of a public right-of-way.

Site improvements means landscaping, paving for pedestrian and vehicular ways, outdoor lighting, recreational facilities, and similar site additions.

Sleeping accommodations means rooms in which people sleep (for example, dormitory and hotel or motel guest rooms).

Space means a definable area, e.g., toilet room, hall, assembly area, parking area, entrance, storage room, alcove, courtyard, or lobby.

Standard means any standard for accessibility issued under the Architectural Barriers Act.

Standard-setting agency means one of the four agencies required to issue standards under the Architectural Barriers Act, i.e., the General Services Administration, the Department of Housing and Urban Development, the Department of Defense, and the United States Postal Service.

Structural impracticability means having little likelihood of being accomplished without removing or altering a load-bearing structural member and/or incurring an increased cost of 50 percent or more of the value of the element of the building or facility involved.

Tactile means perceptible through the sense of touch.

Temporary means elements are not permanent (i.e., installed for less than six months) and are not required for safety reasons.

Walk means an exterior pathway or space with a prepared surface intended for pedestrian use and having a slope of 1:20 or less. It includes general pedestrian areas such as plazas and courts.

[47 FR 33864, Aug. 4, 1982, as amended at 54 FR 5444, Feb. 3, 1989]

§ 1190.4 Issuance of Architectural Barriers Act standards by standard-setting agencies.

(a) These guidelines and requirements are the minimum guidelines and requirements for standards issued under the Architectural Barriers Act by the Administrator of General Services, Secretary of Housing and Urban Development, Secretary of Defense, and Postmaster General.

(b) Standards which conform to or exceed the provisions of the guidelines

§ 1190.5

shall be deemed in compliance with the guidelines and requirements.

(c) Each standard-setting agency is encouraged to issue standards which follow the format of these guidelines and requirements. However, standards which differ in format from these guidelines and requirements but are otherwise consistent with the guidelines and requirements shall be deemed in compliance with these guidelines and requirements.

§ 1190.5 Guidelines: Other uses.

These minimum guidelines and requirements and those standards published by the four standard-setting agencies under the Architectural Barriers Act of 1968, as amended, may be used by other governmental and non-governmental entities, along with other sources, to develop their own standards.

§ 1190.6 Interpretation of guidelines.

(a) These guidelines and requirements shall be liberally construed to carry out the purposes and provisions of the Architectural Barriers Act and section 502 of the Rehabilitation Act.

(b) Words importing the singular number may extend and be applied to the plural and vice versa. However, unless otherwise specified in the guidelines and requirements, each element or space of a particular building or facility shall comply with the guidelines and requirements.

(c) Use of the imperative mood, *e.g.*, “provide,” means the provision is mandatory. This form is being used to avoid wordiness and monotony but means the same as if the word “shall” had been included.

(d) The provisions in the minimum guidelines and requirements are based upon adult dimensions and anthropometrics.

(e) Dimensions that are not marked “minimum” or “maximum” are absolute, unless otherwise indicated in the text or captions. All dimensions are subject to conventional building tolerances for field conditions.

§ 1190.7 Severability.

If any section, subsection, paragraph, sentence, clause, or phrase of these guidelines and requirements is declared

36 CFR Ch. XI (7–1–04 Edition)

invalid for any reason, the remaining portions of these guidelines and requirements that are severable from the invalid part shall remain in full force and effect. If a part of these guidelines and requirements is invalid in one or more of its applications, the part shall remain in effect in all valid applications that are severable from the invalid applications.

[47 FR 33864, Aug. 4, 1982. Redesignated at 54 FR 5444, Feb. 3, 1989]

Subpart B—Scope

§ 1190.30 Scope. [Reserved]

§ 1190.31 Accessible buildings and facilities: New construction.

Except as otherwise provided in this part, all new construction of buildings and facilities shall comply with the minimum requirements set forth below. The citations beginning with “ANSI” in the provisions which follow refer to the sections of the American National Standard, ANSI A117.1–1986, “Providing Accessibility and Usability for Physically Handicapped People” by the American National Standards Institute, Inc. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the American National Standards Institute, Inc., 1430 Broadway, New York, NY 10018. Copies may be inspected at the office of the U.S. Architectural and Transportation Barriers Compliance Board, 1111 18th Street, NW., Suite 501, Washington, DC or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(a) Accessible route. At least one accessible route shall comply with ANSI A117.1–1986, section 4.3, Accessible Routes (Incorporated by reference, see this paragraph (a).)

(1) Required accessible route(s) shall connect an accessible building entrance with:

(i) Transportation facilities located within the property line of a given site,

including passenger loading zones, public transportation facilities, taxi stands, and parking;

(ii) Public streets and sidewalks;

(iii) Other accessible buildings, facilities, elements, and spaces that are on the same site; and

(iv) All accessible spaces, rooms, and elements within the building or facility.

(2) Where fire code provisions require more than one means of egress from any space or room, then more than one accessible means of egress complying with ANSI A117.1-1986, section 4.3.10 shall be provided for handicapped people and shall be arranged so as to be readily accessible from all accessible rooms and spaces (Incorporated by reference, see § 1190.31(a).)

(b) *Parking and passenger loading zones.* (1) If any parking is provided, for employees or visitors, or both, each such parking area shall comply with ANSI A117.1-1986 section 4.6 Parking Spaces and Passenger Loading Zones (Incorporated by reference, see paragraph (a) of this section), and the following table:

Total parking in lot	Required minimum number of accessible spaces
1 to 25	1.
26 to 50	2.
51 to 75	3.
76 to 100	4.
101 to 150	5.
151 to 200	6.
201 to 300	7.
301 to 400	8.
401 to 500	9.
501 to 1,000	2 pct of total.
Over 1,000	20 plus 1 for each 100 over 1,000.

Passenger loading zones shall provide an access aisle at least 60 in (1525 mm) wide and 20 ft (60 mm) long adjacent and parallel to the vehicle pull-up space. If there are curbs between the access aisle and the vehicle pull-up space, then a curb ramp complying with ANSI A117.1-1986, section 4.7 shall be provided. A minimum vertical clearance of 114 in (3.45 m) shall be provided at accessible passenger loading zones and along vehicle access routes to such areas from site entrances.

(i) *Exception:* The total number of accessible parking spaces may be distributed among parking lots, if greater accessibility is achieved.

(ii) *Exception:* This paragraph does not apply to parking provided for official government vehicles owned or leased by the government and used exclusively for government purposes.

Parking spaces for side lift vans are accessible parking spaces and may be used to meet the requirements of this paragraph.

(2) If passenger loading zones are provided, at least one passenger loading zone shall comply with ANSI A117.1-1986 section 4.6 Parking Spaces and Passenger Loading Zones (Incorporated by reference, see paragraph (a) of this section).

(c) *Ramps and curb ramps.* If there is an abrupt level or grade change, if the slope is greater than 1:20, and if no other means of accessible vertical access is provided, a ramp or curb ramp shall be provided. If a ramp or curb ramp is provided, it shall comply with ANSI A117.1-1986, section 4.7 Curb Ramps or 4.8 Ramps, as appropriate (Incorporated by reference, see paragraph (a) of this section.).

(d) *Stairs.* Except as provided in paragraph (f)(1) of this section, stairs connecting levels that are not connected by an elevator shall comply with ANSI A117.1-1986, section 4.9, Stairs. (Incorporated by reference, see paragraph (a) of this section.)

(e) *Handrails.* Handrails shall be provided at each ramp and staircase as required in ANSI A117.1-1986, sections 4.8 Ramps and 4.9 Stairs, respectively. (Incorporated by reference, see paragraph (a) of this section.)

(f) *Elevators.* One passenger elevator complying with ANSI A117.1-1986, section 4.10, Elevators (incorporated by reference, see paragraph (a) of this section) shall serve each level in all multi-story buildings and facilities. If more than one elevator is provided, each elevator shall comply with ANSI A117.1-1986, section 4.10, Elevators (incorporated by reference, see paragraph (a) of this section). All elevator control buttons shall be at least ¾ in (19mm) in their smallest dimension. They shall be raised or flush.

(1) *Exception.* Elevator pits, elevator penthouses, mechanical rooms, piping, or equipment catwalks are excepted from this requirement.

(2) *Exception.* Ramps or platform lifts complying with ANSI A117.1–1986, section 4.8 Ramps and ANSI A117.1–1986, section 4.11 Platform Lifts (incorporated by reference, see paragraph (a) of this section), respectively, may be used in lieu of an elevator.

(g) *Platform lifts.* If the slope is greater than 1:20, and if no other means of accessible vertical access is provided, a platform lift may be provided if there is an abrupt level or grade change. If a platform lift is provided, it shall comply with ANSI A117.1–1986, section 4.11 Platform Lifts (incorporation by reference, see paragraph (a) of this section), and should facilitate unassisted entry and exit from the lift.

(h) *Entrances.* At least one principal entrance at each grade floor level to a building or facility shall comply with ANSI A117.1–1986, section 4.14, Entrances (incorporated by reference, see paragraph (a) of this section). When a building or facility has entrances which normally serve any of the following functions: transportation facilities, passenger loading zones, accessible parking facilities, taxi stands, public streets and sidewalks, accessible interior vertical access, then at least one of the entrances serving each such function shall comply with ANSI A117.1–1986, section 4.14, Entrances (incorporated by reference, see paragraph (a) of this section). Because entrances also serve as exits, particularly in cases of emergency, the proximity of such accessible entrances and exits to all parts of the building is essential. It is preferable that all or most entrances and exits be accessible. One entrance may serve more than one function.

(i) *Doors.* (1) At each accessible entrance to a building or facility, at least one door shall comply with ANSI A117.1–1986, section 4.13, Doors (incorporated by reference, see paragraph (a) of this section).

(2) Within a building or facility, at least one door at each accessible entrance to the accessible space shall comply with ANSI A117.1–1986, section 4.13, Doors (incorporated by reference, see paragraph (a) of this section).

(3) Each door required by ANSI A117.1–1986, section 4.3.10, Egress (incorporated by reference, see paragraph (a) of this section), shall comply with

ANSI A117.1–1986, section 4.13, Doors (incorporated by reference, see paragraph (a) of this section).

(4) Each door that is an element of an accessible route shall comply with ANSI A117.1–1986, section 4.13, Doors (incorporated by reference, see paragraph (a) of this section).

(j) *Windows.* If operable windows are provided, they shall comply with ANSI A117.1–1986, section 4.12 Windows. (Incorporated by reference, see paragraph (a) of this section.)

(k) *Toilet and bathing facilities.* If toilet and bathing facilities are provided, then each public and common use toilet room shall comply with ANSI A117.1–1986, section 4.22, Toilet Rooms, Bathrooms, Bathing Facilities and Shower Rooms (incorporated by reference, see paragraph (a) of this section). Other toilet rooms shall be adaptable. If bathing facilities are provided, then each public and common use bathing facility shall comply with ANSI A117.1–1986, section 4.22. In each such facility where any of the fixtures and accessories specified in ANSI A117.1–1986, section 4.16, Water Closets; ANSI A117.1–1986, section 4.17, Toilet Stalls; ANSI A117.1–1986, section 4.18, Urinals; ANSI A117.1–1986, section 4.19, Lavatories, Sinks and Mirrors; ANSI A117.1–1986, section 4.20, Bathtubs; and ANSI A117.1–1986, section 4.21, Shower Stalls, are provided, at least one accessible fixture and accessory of each type provided shall comply with the provisions in the subsection applicable to that fixture or accessory. The size and arrangement of toilet stalls shall comply with ANSI Fig. 30(a). Toilet stalls with a minimum depth of 56 in (1420 mm) (see ANSI Fig. 30(a)) shall have wall-mounted closets. If the depth of toilet stalls is increased at least 3 in (75 mm), then a floor mounted water closet may be used. Arrangements shown for toilet stalls may be reversed to allow either a left-hand or right-hand approach. Installation of a fixed shower head may be permitted in lieu of an adjustable height or hand-held shower head in unmonitored facilities where vandalism is a concern. Curbs in shower stalls that are 36 in by 36 in (915 mm by 915 mm) shall have a maximum height of ½ in (13 mm). Bathrooms in dwelling units required to be accessible shall

comply with ANSI A117.1-1986, section 4.32.4, Bathrooms. For special use situations, refer to Subpart E, Special Building or Facility Types or Elements.

(l) *Drinking fountains and water coolers.* If drinking fountains or water coolers are provided, approximately 50% of those provided on each floor shall comply with ANSI A117.1-1986, section 4.15, Drinking Fountains and Water Coolers, (incorporated by reference, see paragraph (a) of this section), and shall be dispersed throughout the floor. If only one drinking fountain or water cooler is provided on any floor, it shall comply with ANSI A117.1-1986, section 4.15. It is preferred that if only one drinking fountain or water cooler is provided on any floor, then it should have two levels with the lower level complying with ANSI A117.1-1986, section 4.15.

(m) *Controls and operating mechanisms.* If controls and operating mechanisms are provided in accessible spaces, along accessible routes or as parts of accessible elements, each shall comply with ANSI A117.1-1986, section 4.25, Controls and Operating Mechanisms. (Incorporated by reference, see paragraph (a) of this section.)

(n) *Alarms.* If alarm systems are provided, each shall comply with ANSI A117.1-1986, section 4.26, Alarms (incorporated by reference, see paragraph (a) of this section). In facilities with sleeping accommodations, the sleeping accommodations required to be accessible shall have an alarm system complying with ANSI A117.1-1986, section 4.26.4, Auxiliary Alarms. Emergency warning systems in health care facilities may be modified to suit standard health care alarm design practice.

(o) *Detectable warnings.* Detectable warnings complying with ANSI A117.1-1986, section 4.27.3, Tactile Warnings on Doors to Hazardous Areas (incorporated by reference, see paragraph (a) of this section), shall be provided on the hardware of all doors leading to hazardous areas. Such warnings shall not be used at emergency exit doors. Detectable warnings are not required at locations other than doors to hazardous areas by this part. If detectable warnings are provided, the specifications at ANSI A117.1-1986, section 4.27 may be used as guidance.

NOTE: The ATBCB has funded research in the area of detectable tactile surface treatments. The research findings were inconclusive and, therefore, recommended no mandatory requirements at this time. Further information is being developed through additional research on detectable materials and fact-finding on current applications, particularly on transit platforms. Technical assistance materials including information about additional detectable cues (sound and resiliency) not discussed in ANSI are available from the ATBCB, 1111 18th Street, NW, Suite 501, Washington, DC 20036, (202) 653-7834 (voice or TDD).

(p) *Signage.* Signage shall comply with ANSI A117.1-1986, section 4.28, Signage (incorporated by reference, see paragraph (a) of this section). Permanent signage that identifies rooms and spaces shall also comply with ANSI A117.1-1986, section 4.28.4. Exception: The provisions of ANSI A117.1-1986, section 4.28.4 are not mandatory for temporary information on room and space signage, such as current occupant's name, provided the permanent room or space identification complies with ANSI A117.1-1986, section 4.28.4.

(q) *Telephones.* (1) If public telephones are provided, then accessible public telephones shall comply with ANSI A117.1-1986, section 4.29, Telephones (incorporated by reference, see paragraph (a) of this section), and the following table:

Number of public telephones provided on each floor	Number of telephones required to be accessible ¹
One or more single unit installations.	One per floor.
One bank ²	One per floor.
Two or more banks ²	One per bank. Accessible unit may be installed as a single unit in proximity (either visible or with signage) to bank. At least one public telephone per floor shall meet the requirements for a forward reach telephone. ³

¹Additional public telephones may be installed at any height; however, the installation of accessible telephones is strongly recommended. Unless otherwise specified, accessible telephones may be either forward reach or side reach telephones.

²A bank consists of two or more adjacent public telephones usually installed as a unit.

³Exception for exterior installations only: If dial-tone-first service is not available, then a side reach telephone may be installed instead of the required forward reach telephone (i.e., one telephone in proximity to each bank shall meet the requirements of ANSI A117.1-1986, section 4.29, Telephones (incorporated by reference, see paragraph (a) of this section)).

(2) At least one of the public telephones complying with ANSI A117.1-

§ 1190.31

36 CFR Ch. XI (7–1–04 Edition)

1986, section 4.29, Telephones (incorporated by reference, see paragraph (a) of this section), shall be equipped with a volume control. The installation of additional volume controls is encouraged and these may be installed on any public telephone provided.

(3) Signage. [Reserved]

(r) *Seating, tables, and work surfaces.* If fixed seating, tables, and work surfaces are provided, at least 5 percent but always at least one of each element shall comply with ANSI A117.1–1986, section 4.30, Seating, Tables and Work Surfaces. (Incorporated by reference, see paragraph (a) of this section.)

(s) *Assembly areas, conference, or meeting rooms.* (1) If assembly areas are provided, accessible viewing positions shall comply with ANSI A117.1–1986, section 4.31, Auditorium and Assembly Areas (incorporated by reference, see paragraph (a) of this section), and the following table:

Capacity of assembly area	Number of viewing positions
50 to 75	3.
76 to 100	4.
101 to 150	5.
151 to 200	6.
201 to 300	7.
301 to 400	8.
401 to 500	9.
501 to 1,000	2 pct of total.
Over 1,000	20 plus 1 for each 100 over 1,000.

Accessible viewing positions may be clustered in bleachers, balconies, and other areas that have sight lines requiring slopes greater than 5 percent or to permit equivalent accessible viewing positions to be located on levels having accessible egress.

(2) Assembly areas with audio-amplification systems shall have a listening system complying with ANSI A117.1–1986, section 4.31, to assist a reasonable number of people but no fewer than two, with severe hearing loss. For assembly areas without amplification systems and for spaces used primarily as meeting and conference rooms, a permanently installed or portable listening system shall be provided. This requirement may be satisfied by use of a portable system that requires little or no installation. If portable systems are used for conference and meeting rooms, the system may serve more than one room.

(3) If performing areas are provided, accessible routes shall comply with ANSI A117.1–1986, section 4.3, Accessible Routes, to performing areas, including but not limited to stages, arena floors, dressing rooms, locker rooms, and other rooms and spaces required for use of the assembly area. (ANSI 4.33.5)

(i) *Exception.* In alteration work where it is structurally impracticable to alter all performing areas to be on an accessible route, at least one of each type shall be made accessible. (ANSI 4.33.6* and 4.33.7*)

(ii) [Reserved]

(t) *Storage.* If storage facilities such as cabinets, shelves, closets and drawers are provided in accessible spaces for occupant use, at least one storage facility of each type provided shall comply with ANSI A117.1–1986, section 4.23, Storage. (Incorporated by reference, see paragraph (a) of this section.) Additional storage may be provided outside of the dimensions provided in ANSI A117.1–1986, section 4.23, Storage. (Incorporated by reference, see paragraph (a) of this section.)

(u) *Housing.* Accessible housing shall:

(1) Comply with the requirements of this section as it applies to public use and common use areas and areas where handicapped persons may be employed, except as follows:

(i) *Elevators:* Where provided, elevators shall comply with ANSI A117.1–1986, section 4.10 (incorporated by reference, see paragraph (a) of this section). All elevator control buttons shall be at least $\frac{3}{4}$ in (19 mm) in their smallest dimension. They shall be raised or flush. Elevators or other accessible means of vertical movement are not required in residential facilities when:

(A) No accessible dwelling units are located above or below the accessible grade level; and

(B) At least one of each type of common area and amenity provided for use of residents and visitors is available at the accessible grade level.

(ii) *Entrances:* Entrances complying with ANSI 4.14 shall be provided as necessary to achieve access to and egress from buildings and facilities. EXCEPTION: In projects consisting of one-to-four family dwellings where accessible

entrances would be extraordinarily costly due to site conditions or local code restrictions, accessible entrances are required only to those buildings containing accessible dwelling units.

(iii) **Common Areas:** At least one of each type of common area and amenity in each project shall be accessible and shall be located on an accessible route to any accessible dwelling unit.

(2) Provide dwelling units or sleeping accommodations complying with ANSI 4.32, Dwelling Units, in accordance with the following table:

Facilities	Application
Hotels, motels, boarding houses.	5 percent of the total units, or at least one, whichever is greater.
Multifamily housing (including apartment houses) Federally assisted.	5 percent of the total, or at least one unit, whichever is greater in multifamily housing projects.
Federally owned	5 percent of the total, or at least one unit, whichever is greater in multifamily housing projects.
Dormitories	5 percent of the total, or at least one unit whichever is greater.
One and two family dwelling Federally assisted, rental.	5 percent of the total, or at least one unit, whichever is greater, in multifamily housing projects.
Federally assisted homeownership.	To be determined by home buyer.
Federally owned	5 percent of the total, or at least one unit, whichever is greater in multifamily housing projects.

(v) **Health care facilities.** Accessible health care facilities shall:

(1) Comply with the requirements of this section, as it applies to public use and common use areas and areas where handicapped persons may be employed; and

(2) Provide patient rooms and patient toilet rooms complying with Part 6 of UFAS in accordance with the following table:

Facilities	Application
Long term care facilities (including skilled nursing facilities, intermediate care facilities, bed and care, and nursing homes).	At least 50 percent of patient toilets and bedrooms.
Outpatient facilities	All patient toilets and bedrooms.
Hospital:	
General purpose hospital	At least 10 percent of patient toilets and bedrooms.
Special purpose hospital (hospitals that treat conditions that affect mobility).	All patient toilets and bedrooms.

[47 FR 33864, Aug. 4, 1982. Redesignated and amended at 54 FR 5444, Feb. 3, 1989; 54 FR 34977, Aug. 23, 1989; 69 FR 18803, Apr. 9, 2004]

§ 1190.32 Accessible buildings and facilities: Additions.

Each addition to an existing building or facility shall comply with § 1190.31. New construction, except as follows:

(a) **Entrances.** If a new addition to a building or facility does not have an entrance, then at least one entrance in the existing building or facility shall comply with ANSI A117.1-1986, section 4.14, Entrances. (The citations beginning with "ANSI" in this section refer to the sections of the American National Standard, ANSI A117.1-1986, "Providing Accessibility and Usability for Physically Handicapped People" by the American National Standards Institute, Inc. which has been approved for incorporation by reference as set forth in § 1190.31(a).

(b) **Accessible route.** If the only accessible entrance to the addition is located in the existing building or facility, then at least one accessible route shall comply with ANSI A117.1-1986, section 4.3, Accessible Route (incorporated by reference, see § 1190.31(a)), and shall provide access through the existing building or facility to all rooms, elements, and spaces in the new addition.

(c) **Toilet and bathing facilities.** If there are no toilet rooms and bathing facilities in the addition and these facilities are provided in the existing building, then at least one toilet and bathing facility in the existing building shall comply with ANSI A117.1-1986, section 4.22, Toilet Rooms, Bathrooms, Bathing Facilities and Shower Rooms. (Incorporated by reference, see § 1190.31(a).)

(d) **Elements, spaces, and common areas.** If elements, spaces, or common areas are located in the existing building and they are not provided in the addition, consideration should be given to making those elements, spaces, and common areas accessible in the existing building.

(e) **Exception.** Mechanical rooms, storage areas, and other such minor additions which normally are not frequented by the public or employees of the facility are excepted from paragraphs (a), (b), (c) and (d) of this section.

[47 FR 33864, Aug. 4, 1982. Redesignated and amended at 54 FR 5444, 5446, Feb. 3, 1989]

§ 1190.33 Accessible buildings and facilities: Alterations.

(a) *General.* Alterations to existing buildings or facilities shall comply with the following:

(1) If existing elements, spaces, essential features, or common areas are altered, then each such altered element, space, feature, or area shall comply with the applicable provisions of § 1190.31, Accessible buildings and facilities: New construction, except as noted in paragraph (a)(2) of this section.

(2) Exceptions to the requirements for (a)(1) of this section for existing buildings or facilities are:

(i) *Stairs.* Full extension of stair handrails shall not be required in alterations where such extensions would be hazardous or impossible due to plan configuration.

(ii) *Elevators.* (A) If a safety door edge is provided in existing automatic elevators, then the automatic door reopening devices may be omitted (see ANSI A117.1-1986 section 4.10.6). (The citations beginning with “ANSI” in this section refer to the sections of the American National Standard, ANSI A117.1-1986, “Providing Accessibility and Usability for Physically Handicapped People” by the American National Standards Institute, Inc. which has been approved for incorporation by reference as set forth in § 1190.31(a).

(B) Where existing shaft or structural elements prohibit strict compliance with ANSI A117.1-1986, section 4.10.9 (incorporated by reference, see § 1190.31(a)), then the minimum floor area dimensions may be reduced by the minimum amount necessary, but in no case shall they be less than 48 in by 48 in (1220 mm by 1220 mm).

(iii) *Doors.* (A) Where existing elements prohibit strict compliance with the clearance requirements of ANSI 4.13.5, a projection of 5/8 in (16 mm) maximum will be permitted for the latch side door stop. (The citations beginning with “ANSI” in this section refer to the sections of the American National Standard, ANSI A117.1-1986, “Providing Accessibility and Usability for Physically Handicapped People” by the American National Standards Institute, Inc. which has been approved

for incorporation by reference as set forth in § 1190.31(a).)

(B) If existing thresholds measure $\frac{3}{4}$ in (19 mm) high or less, and are beveled or modified to provide a beveled edge on each side, then they may be retained.

(iv) *Toilet rooms.* Where alterations to existing facilities make strict compliance with ANSI A117.1-1986, sections 4.22 and 4.23 (incorporated by reference, see § 1190.31(a)) structurally impracticable, the addition of one “unisex” toilet per floor containing one water closet complying with ANSI A117.1-1986, section 4.16 and one lavatory complying with ANSI A117.1-1986, section 4.19, located adjacent to existing toilet facilities, will be acceptable in lieu of making existing toilet facilities for each sex accessible.

(v) *Assembly areas.* (A) In alterations where it is structurally impracticable to disperse seating throughout the assembly area, seating may be located in collected areas as structurally feasible. Seating shall adjoin an accessible route that also serves as a means of emergency egress.

(B) In alterations where it is structurally impracticable to alter all performing areas to be on an accessible route, then at least one of each type shall be made accessible.

(3) If power-driven vertical access equipment (e.g., escalator) is planned or installed where none existed previously, or if new stairs (other than stairs installed to meet emergency exit requirements) requiring major structural changes are planned or installed where none existed previously, then a means of accessible vertical access shall be provided that complies with ANSI A117.1-1986, section 4.8, Ramps; ANSI A117.1-1986, section 4.10, Elevators; or ANSI A117.1-1986, section 4.11, Platform Lifts (incorporated by reference, see § 1190.31(a)) except to the extent where it is structurally impracticable in transit facilities. All elevator control buttons shall be at least $\frac{3}{4}$ in (19 mm) in their smallest dimension. They shall be raised or flush.

(4) If alterations of single elements, when considered together, amount to an alteration of a space of a building or facility, the entire space shall be made accessible.

(b) Where a building or facility is vacated and it is totally altered, then it shall comply with § 1190.31 Accessible buildings and facilities: New construction, except to the extent where it is structurally impracticable.

(c) Where substantial alteration occurs to a building or facility, then each element or space that is altered or added shall comply with the applicable provisions of § 1190.31, Accessible buildings and facilities: New construction, except to the extent where it is structurally impracticable and the altered building or facility shall contain:

(1) At least one accessible route complying with ANSI A117.1-1986, section 4.3, Accessible Routes (incorporated by reference, see § 1190.31(a)), and paragraph (a) of this section;

(2) At least one accessible entrance complying with ANSI A117.1-1986, section 4.14, Entrances (incorporated by reference, see § 1190.31(a)). If additional accessible entrances are altered, then they shall comply with paragraph (a)(1) of this section; and

(3) The following toilet facilities, whichever number is greater:

(i) At least one toilet facility for each sex in the altered building complying with ANSI A117.1-1986, section 4.22, Toilet Rooms, Bathrooms, Bathing Facilities, and Shower Rooms (incorporated by reference, see § 1190.31(a));

(ii) At least one toilet facility for each sex on each substantially altered floor, where such facilities are provided, complying with ANSI A117.1-1986, section 4.22, Toilet Rooms, Bathrooms, Bathing Facilities, and Shower Rooms (incorporated by reference, see § 1190.31(a));

In making the determination as to what constitutes "substantial alteration," the agency issuing standards for the facility shall consider the total cost of all alterations (including but not limited to electrical, mechanical, plumbing, and structural changes) for a building or facility within any twelve (12) month period. For guidance in implementing this provision, an alteration to any building or facility is to be considered substantial if the total cost for this twelve month period amounts to 50% or more of the full and

fair cash value of the building as defined at § 1190.3.

(4) *Exception.* If the cost of the elements and spaces required by paragraphs (c) (1), (2), and (3) of this section, exceeds 15% of the total cost of all other alterations, then a schedule may be established by the standard-setting and/or funding agency to provide the required improvements within a 5 year period.

(5) *Exception.* If the alteration is limited solely to the electrical, mechanical, or plumbing system and does not involve the alteration of any elements and spaces required to be accessible under part 1190, then paragraph (c) of this section, does not apply.

(6) *Exception.* Consideration shall be given to providing accessible elements and spaces in each altered building or facility complying with:

(i) ANSI A117.1-1986, sections 4.6, Parking Spaces and Passenger Loading Zones, as modified by § 1190.31(s)(1);

(ii) ANSI A117.1-1986, section 4.15, Drinking Fountains and Water Coolers;

(iii) ANSI A117.1-1986, section 4.23, Storage;

(iv) ANSI A117.1-1986, section 4.26, Alarms;

(v) ANSI A117.1-1986, section 4.29, Telephones;

(vi) ANSI A117.1-1986, section 4.30, Seating, Tables and Work Surfaces;

(vii) ANSI 4.31, Auditorium and Assembly Areas, as modified by § 1190.31(s)(1). (Incorporated by reference, see § 1190.31(a).)

(7) *Exception:* Mechanical rooms and other spaces which normally are not frequented by the public or employees of the facility or which by nature of their use are not required by the Architectural Barriers Act to be accessible are excepted from paragraphs (c) (1), (2), and (3) of this section.

[47 FR 33864, Aug. 4, 1982. Redesignated and amended at 54 FR 5444, 5446, Feb. 3, 1989]

§ 1190.34 Accessible buildings and facilities: Leased.

(a) Buildings or facilities or portions thereof leased by the Federal Government shall comply with § 1190.31, New construction, or shall incorporate the features listed in § 1190.33(c), Alterations. Where both types of buildings are available for leasing, reasonable

§ 1190.34

36 CFR Ch. XI (7–1–04 Edition)

preference must be given to buildings or facilities complying with § 1190.31, New construction.

(b) If space complying with paragraph (a) of this section is not available, space may be leased only if the space meets, or is altered to meet, the following conditions:

(1) At least one accessible route is provided from an accessible entrance complying with § 1190.120, Entrances, to those areas in which the principal activities for which the building or facility was leased are conducted. Separate accessible routes may be provided to areas serving different groups of users (e.g., the public, employees).

(2) The accessible route shall comply with the requirements of § 1190.50, Walks, floors, and accessible routes, and provide access to whatever accessible facilities are either required or provided, such as accessible toilets.

(i) Toilet facilities, to the extent required for the ready intended use of the building or facility, shall be provided as follows—

(A) Where more than one toilet for each sex is provided in a building or facility, at least one toilet facility which complies with § 1190.150, Toilet and bathing facilities, shall be provided for each sex on each floor having toilets; or

(B) In a building or facility providing only one toilet for each sex, either one unisex toilet or one toilet for each sex complying with § 1190.150 shall be provided; or

(C) In a building or facility where only one toilet is provided, one unisex toilet complying with § 1190.150 shall be provided.

(ii) Parking facilities, if a parking area is included within the lease, shall be provided complying with § 1190.60, Parking and passenger loading zones, to the extent feasible.

(3) Where an agency determines that an area does not require the provision of toilets or parking facilities for the users or occupants of that area, nothing in this section shall be construed to require the provision of any such facilities.

(4) Consideration shall be given to providing accessible elements and spaces in each altered building or facility complying with:

(i) Section 1190.160 Drinking fountains and water coolers;

(ii) Section 1190.180 Alarms;

(iii) Section 1190.210 Telephones;

(iv) Section 1190.220 Seating, tables, and work surfaces;

(v) Section 1190.230 Assembly areas; and

(vi) Section 1190.240 Storage.

(c) If space leased in accordance with the requirements of paragraph (a) or (b) of this section is subsequently altered, then the alterations shall comply with the requirements of § 1190.33, Alterations.

(d) If space leased in accordance with the requirements of paragraph (a) or (b) of this section is increased by construction of an addition, the addition shall comply with § 1190.32, Additions, to the extent it is leased by the Federal Government.

(e) If leased space at the time of leasing meets past or present state or local codes or the recommended standards of the American National Standards Institute (ANSI) A117.1 for accessibility to physically handicapped people, and provides the features required by this section, the space may be used as is or altered to comply with the technical requirements of paragraph (a) or (b) of this section.

(f) Once leased space in an existing building is accessible or is made accessible hereunder, no new accessibility alterations shall be required under this subpart except where alterations or additions are made to the building which are covered by paragraphs (c) and (d) of this section.

(g) *Exceptions.* (1) If no space complying with paragraph (a) or (b) of this section is available for leasing, space as available may be leased without alterations:

(i) If the lease is necessary for officials servicing natural or human-made disasters on an emergency basis;

(ii) If the space is used on an intermittent basis; or

(iii) If the occupancy of the space is for no more than twelve months. If delays occur during the twelve months, the short-term lease may be extended for no more than an additional 12 months.

Architectural and Transp. Barriers Compliance Board

§ 1191.1

(2) Mechanical rooms and other spaces which normally are not frequented by the public or employees with handicaps of the occupant agency or which by nature of their use are not required to be accessible are excepted from this section.

[53 FR 35510, Sept. 14, 1988. Redesignated at 54 FR 5444, Feb. 3, 1989]

Subpart C—Technical Provisions

§ 1190.40 Technical specifications.

Features, elements and spaces required to be accessible by § 1190.31, § 1190.32, or § 1190.33 shall meet the technical requirements specified in the provisions of sections 4.2 through 4.32 of ANSI A117.1-1986, "American National Standard for Buildings and Facilities—Providing Accessibility and Usability for Physically Handicapped People," which is incorporated herein by reference, except as noted herein. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the American National Standards Institute, Inc., 1430 Broadway, New York, NY 10018. Copies may be inspected at the office of the U.S. Architectural and Transportation Barriers Compliance Board, 1111 18th Street, NW., Suite 501, Washington, DC or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

[54 FR 5447, Feb. 3, 1989, as amended at 69 FR 18803, Apr. 9, 2004]

§ 1190.50 Exceptions.

(a) In addition to ANSI A117.1-1986, section 4.10 (incorporated by reference, see § 1190.31(a)), Elevators, the following requirement is added: Hall call buttons provided under ANSI A117.1-1986, section 4.10.3 shall be raised or flush.

(b) Under ANSI A117.1-1986, section 4.7 (incorporated by reference, see § 1190.31(a)), Curb Ramps, and ANSI 117.1-1986, section 4.7.7, Warning Textures, and ANSI 117.1-1986, section

4.7.12, Uncurbed Intersections, shall not apply.

(c) In addition to ANSI A117.1-1986, section 4.28, Signage (incorporated by reference, see § 1190.31(a)), there is added the requirement that interior tactile signage identifying rooms and spaces be located alongside the door on the latch side and be mounted at a height between 54 in and 66 in (1370 mm and 1675 mm) above the finished floor.

[54 FR 5447, Feb. 3, 1989]

Subpart D—Special Building or Facility Types or Elements

§ 1190.60 Special building or facility types.

The requirements specified in the Uniform Federal Accessibility Standards (UFAS) in sections 5, Restaurants and Cafeterias; 6, Health Care; 7, Mercantile; 8, Libraries; and 9, Postal Facilities, are deemed to satisfy minimum guidelines and requirements of the ATBCB for accessibility standards for those building and facility types.
